

Caltanissetta

ARCUS PROFESSIONAL / ONE-PAGE TERRITORY BRIEFING

The selected province requires preliminary screening for Bridge interventions. The value is not the case list: it is understanding whether Caltanissetta has already shown concentrated vulnerability under extreme conditions or risk distributed over time.

PRIORITY INDEX 42/100 territorial exposure	COLLAPSE RATE N/A confidence unavailable	EVENTS 1 ARCUS cases in sample	EVIDENCE 3 linked sources
--	--	--	---

DECISION MESSAGE

Concentrated critical event

collapses concentrated in a single critical-event scenario (2009-05-21, 100%). Collapse Rate unavailable: AINOP denominator is insufficient or coverage is not validated for this province.

01

NEXT ACTIONS

- Use the territorial exposure indicators to identify the dominant territorial signal.
- Review the documented concentrated historical scenario and use the map/appendix only as case reference.
- Request the minimum technical data package for the dominant structural signal before site-specific design assumptions.
- Commission site-specific checks calibrated to the dominant structural context and local geomorphology.

DATA REQUEST PACKAGE

Local hazard study; asset geometry and foundations; inspection history; source-backed site constraints.

CONFIDENCE NOTE

Collapse Rate confidence unavailable because AINOP coverage is insufficient.
