

Pesaro Urbino

ARCUS PROFESSIONAL / ONE-PAGE TERRITORY BRIEFING

The selected province requires preliminary screening for Bridge interventions. The value is not the case list: it is understanding whether Pesaro Urbino has already shown concentrated vulnerability under extreme conditions or risk distributed over time.

PRIORITY INDEX 65/100 territorial exposure	COLLAPSE RATE N/A confidence unavailable	EVENTS 3 ARCUS cases in sample	EVIDENCE 9 linked sources
---	---	---	--

DECISION MESSAGE

Concentrated flood scenario

collapses concentrated in a single flood/extreme-hydraulic scenario (2022-09-15, 100%). Collapse Rate unavailable: AINOP denominator is insufficient or coverage is not validated for this province.

- 01
- NEXT ACTIONS
- Use the territorial exposure indicators to identify the dominant Hydraulic signal.
 - Review the documented concentrated historical scenario and use the map/appendix only as case reference.
 - Request TR100/TR200 hydraulic model, preliminary scour estimate, riverbed/bathymetry evidence and debris-transport indicators where relevant.
 - Differentiate checks by geomorphology: torrential/confined channels require scour/debris checks; lowland crossings require flood level and duration checks.

DATA REQUEST PACKAGE TR100/TR200 hydraulic model; preliminary scour depth; riverbed/bathymetry evidence; debris transport indicators where relevant.	CONFIDENCE NOTE Collapse Rate confidence unavailable because AINOP coverage is insufficient.
